

Caparo AP Braking is part of the Caparo Vehicle Products group and design and manufacture brake systems and actuation components.

Total solutions for brake systems and clutch actuation components

Caparo AP Braking is a specialist in the design and manufacture of Opposed Piston Calipers including those used on high performance sports cars

Established over 80 years ago Caparo AP Braking is a market leader in the design and manufacture of bespoke braking products (foundation and system components) and have extensive capabilities in the design and production of clutch actuation.

Typical applications include off-road vehicles, high performance sports cars, public transport and industrial vehicles. Customers include Land Rover, London Taxi, Morgan, Modec, LDV and many others.

The very latest CAE and verification technology is fully utilised in the design of all new applications being introduced into the Caparo AP Braking product portfolio

Caparo AP Braking has a unique approach of a total design solution to meet individual customer requirements. This philosophy has led to the development of extensive in house laboratory and test facilities which service clients in both the automotive and industrial sectors.

All Caparo AP Braking components are subjected to the most intensive on and off vehicle test regimes and programmes
