

Caparo Tube Components (CTC), part of the Caparo Vehicle Products group, manufacture simple and complex tubular assemblies, fabrications and components, offering a wide range of products, predominantly to the automotive industry. Accreditations include IIP, TS16949 and ISO 14001.

A major supplier  
of components  
and assemblies  
to the European  
automotive sector

CTC manufacture  
a wide range of  
products, including: -

Charged air ducts

Steering rack tubes

Car seat frames

Track release handles

Facia beams

Fuel filler pipes

Oil & water pipes

Side impact door beams

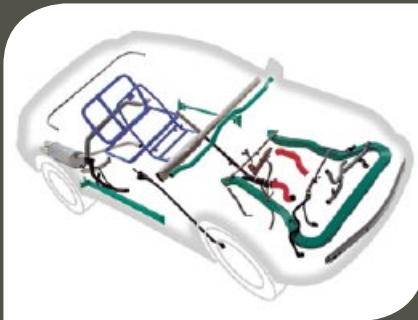

Suspension components

Chassis components

Exhaust components

Crash cans

Engine cradles

CTC do not produce a standard product range; every component is designed, developed, tested and manufactured to the customer's specific requirements whether it be for high or low volume applications. CTC are proud to be a 1st and 2nd tier supplier, exceeding customer's demands anywhere along the supply chain.

CTC offer customers design support and manufacturing feasibility, selecting optimum materials to reduce weight and costs. CTC offer full customer support throughout the product development and design cycles and deliver products manufactured to the highest quality using the latest manufacturing techniques.
